BioSystems 36 (1995) 239–240

BioSystems

# Volume contents

## Volume 36 (1995)

Ageing, oscillations and efficiency
D.A. Gilbert (South Africa) ..... 1–5

Computational properties of self-reproducing growing automata
R. Sosič, R.R. Johnson (Australia, USA) ..... 7–17

Multistaged corpuscular models of microbial growth: Monte Carlo simulations
C. Hatzis, F. Srienc, A.G. Fredrickson (USA) ..... 19–35

Ancient splice junction shadows with relation to blocks in protein structure
V.B. Strelets, H.A. Lim (USA) ..... 37–41

Differential length effects in a binary mixture of single chain amphiphiles in planar monolayers. A three-dimensional approach
L. Movileanu, D. Popescu (Romania) ..... 43–53

Control of metabolic pathways by time-scale separation
J. Delgado, J.C. Liao (USA) ..... 55–70

Adaptive determinism during salt-adaptation in *Sorghum bicolor*
H. Seligmann, G.N. Amzallag (Israel) ..... 71–77

Book reviews ..... 79–86

Molecular neural network devices based on non-linear dynamic media: basic primitive information processing operations
N.G. Rambidi, A.V. Maximychev (Russia) ..... 87–99

Modeling insect olfactory neuron signaling by a network utilizing disinhibition
E. Av-Ron, J.-P. Rospars (France) ..... 101–108

Computer-aided analysis of potential transcription-factor binding sites in the rabbit $\beta$-casein gene promoter
T. Malewski, L. Zwierzchowski (Poland) ..... 109–119

General linear compartment model with zero input: I. Kinetic equations
R. Varón, M.J. García-Meseguer, F. García-Cánovas, B. Havsteen (Spain, Germany) 121–133

General linear compartment model with zero input: II. The computerized derivation of the kinetic equations
R. Varón, M.J. García-Meseguer, B. Havsteen (Spain, Germany) ..... 135–144

General linear compartment model with zero input: III. First passage residence time of enzyme systems
R. Varón, M.J. García-Meseguer, E. Valero, M. García-Moreno, F. García-Cánovas (Spain) ..... 145–156

0303-2647/95/$09.50 © 1995 Elsevier Science Ireland Ltd. All rights reserved

A comparison of methods for self-adaptation in evolutionary algorithms
N. Saravanan, D.B. Fogel, K.M. Nelson (USA) ..... 157–166
The evolution of understanding: A genetic algorithm model of the evolution of communication
M. Levin (USA) ..... 167–178
Slower aging in women: A proposed evolutionary explanation
R. Rossler, P.E. Kloeden, O.E. Rossler (FRG, Australia) ..... 179–185
Magnetic field effects on biomolecules, cells, and living organisms
F.T. Hong (USA) ..... 187–229
Chou-Fasman conformational amino acid parameters and the genetic code
I.Z. Siemion, P.J. Siemion (Poland) ..... 231–238

Volume contents ..... 239–240
Author index ..... 241
Subject index ..... 243–246
